

TOMÁŠ NĚMEC

DEVELOPER (.NET Core, Angular-C#, TypeScript)

<https://xokhezi.github.io/Pfoolio/>

nemec.nuovo@gmail.com

<http://linkedin.com/in/tomáš-němec-2501ab1b7>

FrontEnd

Angular - building responsive FrontEnd for my projects

TypeScript - used in Angular

JavaScript - needed for using TypeScript

Html & Css - needed knowledge for building web apps

BackEnd

C# - experience with WPF desktop apps, now used in building APIs with .NET Core

SQL - all my running apps works with SQL server in company

Framerworks

EntityFramework - used in all projects where is need of SQL database with Code-First approach

IdentityFramework - used in projects where I need user authentication, in some projects I extend it or customize it to my needs.

.NET Core - currently used for building projects

Debbuging & Testing

PostMan - used for debugging and testing APIs

UnitTesting - created few test in apps, basic knowledge

Jasmine - used for my UnitTests

ABOUT ME

I started to code in 2021 with console apps in C#. Interest grow in me very quick as I start to feel that code is THE thing, which I want to do. With time I went through lot of courses and built few projects- some of them you can check on my GitHub or Portfolio (link in contact section).

I have no experience with coding in big team or developer team. I am person who is building projects for users but everything is done by me only. Down bellow you can check something more about my skills. Thank you for reading!
